

# Chelmsford Teaching Schools Alliance

## Science Subject Leader Development Sessions 2020 -2021

Delivered by – Jeremy Crook, Independent Consultant

### Aims of the Session:

During the sessions you will be exploring many things, including how to:

- Increase progress in children’s scientific knowledge and understanding and their skills of working scientifically.
- Create practical science lessons that excite and engage children and are easy to resource.
- Use different types of scientific enquiry to answer questions, including those generated by the children.
- Identify the science in real-life contexts.
- Teach the tricky science concepts including activities linked to climate change.
- Deepen children's learning in science so they can demonstrate mastery.
- Use problem solving to enable children to apply their scientific knowledge and understanding.
- Know what Ofsted expect of primary school science, including during inspections and leading deep dives.

Each session explores activities and aspects of science requested by subject leaders. Plus, it’s a great way to find out what your colleagues are doing in their schools – there is always someone who can give you an idea or two.

#### Delegate feedback

*“Great to hear from someone with so much knowledge and experience.”*  
*“Inspiring and engaging.”*
